

## Digital Health for Allied Health Professionals

## - Dietetics -

Presented by:
Sue Cummins & Katrina Otto
Train IT Medical Pty Ltd
www.trainitmedical.com.au
enquiries@trainitmedical.com.au

We wish to pay our respects to Aboriginal and Torres Strait Islander elders past, present and future.

### **Learning Objectives:**

- 1.Discuss Digital Health current status (what is available and how does it work for a dietitian)
- 2.List patients and use cases where digital health would play a role for dietitians.
- 3. View summaries via My Health Record.
- 4. Meet a dietetics Digital Health 'champion'.
- 5. Develop a plan for integrating digital health in practice.

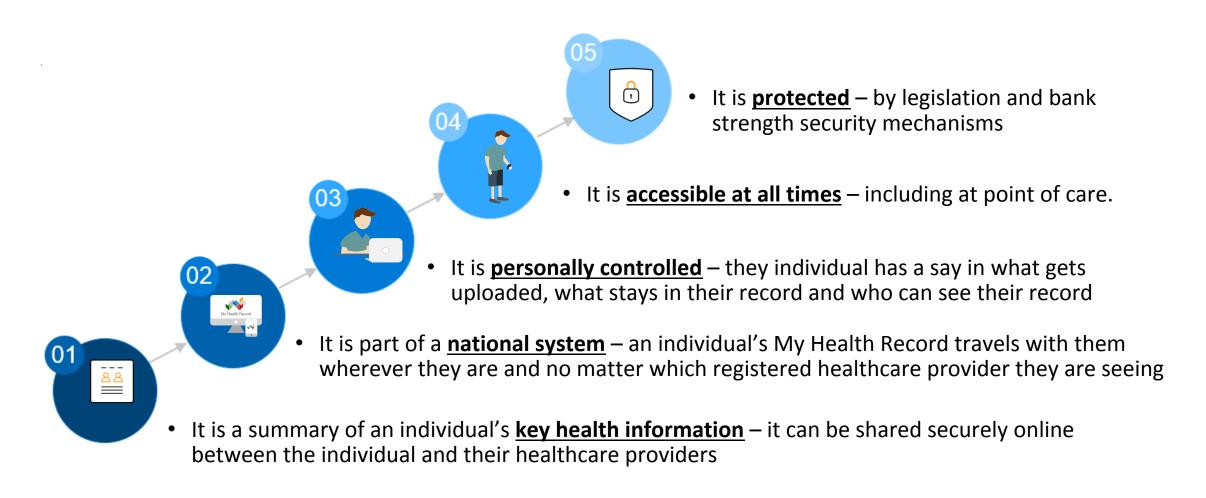

## **Digital Health**

**Electronic Medical Records** My Health Record Secure Messaging Telehealth Apps/wearable technology

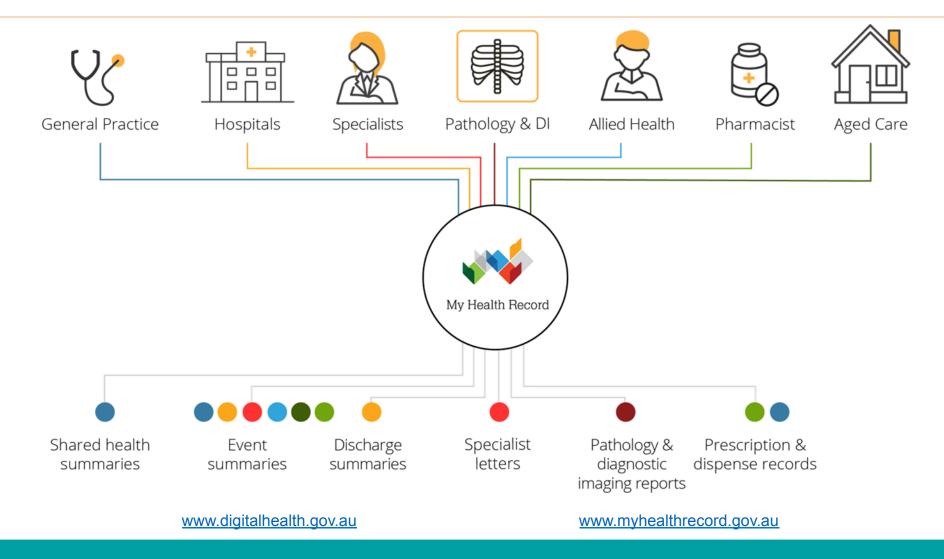

## What is My Health Record?

### We know 90% of consumers are now connected

### We need all patients and providers connected

### **My Health Record Statistics**

as at 28 July 2019

### 90.1% National Participation Rate

State	Participation Rate*
ACT	86.7%
NSW	90.2%
NT	93.6%
QLD	91.2%
SA	89.3%
TAS	90.3%
VIC	89.3%
WΔ	90.4%

\*Participation rate is the number of people who chose not to opt out as a percentage of the number of people eligible for Medicare as at 31 January 2019

16,400 Healthcare provider organisations registered		
Organisation Type*		
General Practice Organisations	7,240	
Public Hospitals and Health Services	832	
Private Hospitals and Clinics	190	
Pharmacies	4,770	
Aged Care Residential Services	239	
Pathology and Diagnostic Imaging Services	119	
Other categories of healthcare providers including Allied Health	2,960	

\*Organisation type based on Healthcare Provider Organisation (HPI-O) data, except that Public Hospital and Health Service registrations are reported by jurisdictions. Number of organisations with a cancelled registration are no longer reported, as they cannot interact with the MHR system.

All organisation registration counts are rounded to three significant figures; therefore, some totals may not correspond with the sum of the separate counts.

## More Australians can access diagnostic test results online

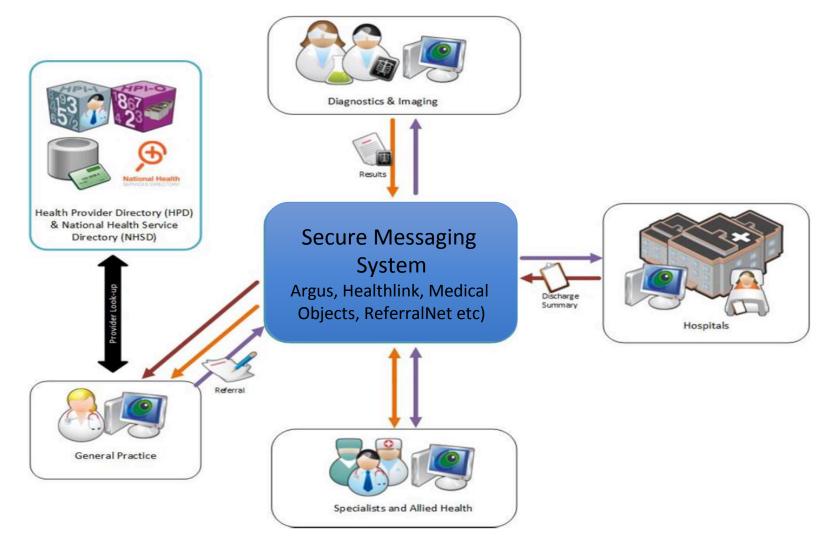

"Nearly all public providers are already uploading and the number of private providers registering, and uploading is accelerating."

850,000 diagnostic reports uploaded each week!

https://www.myhealthrecord.gov.au/news-and-media/media-releases/diagnostic-test-results-online

### **Privacy Controls and Patient View**

Secure exchange of patient information between healthcare providers

### **Status of Secure Messaging**

- ✓ Patient privacy is maintained
- ✓ Can send and receive from clinical software
- ✓ Cheaper than faxing or standard mail
- ✓ More secure than email
- ✓ Eliminates paper copies
- ✓ Improved efficiency as data sends immediately
- ✓ Electronic audit trail

### **Learning Objective 2:**

List patients and use cases where digital health would play a role for dietitians.

### **Meet a Digital Health Champion**

### **Josh Warlow**

Dietitian, Education and Clinical Use Lead (ADHA)

Location: Sydney

### **List patients and Use cases**

The health record that relocates with me – goodbye... >

Monica McInnes and family live a transient life following ADF husband around the country.

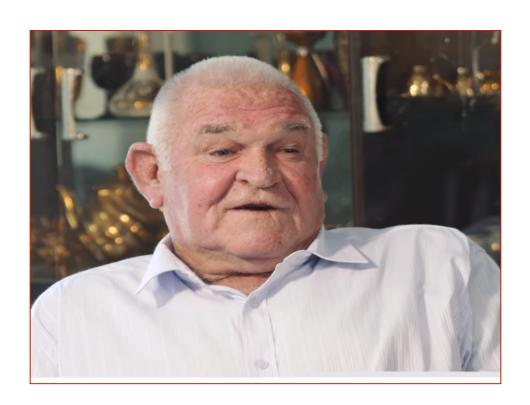

## Liz's My Health Record story >

Liz's My Health Record story professional triathlete and new mum

## **Case Scenarios**

### **Privacy & Confidentiality**

All persons, including administrative staff, who come into contact with the information as part of the health care process also have a duty to maintain the confidentiality of that information.

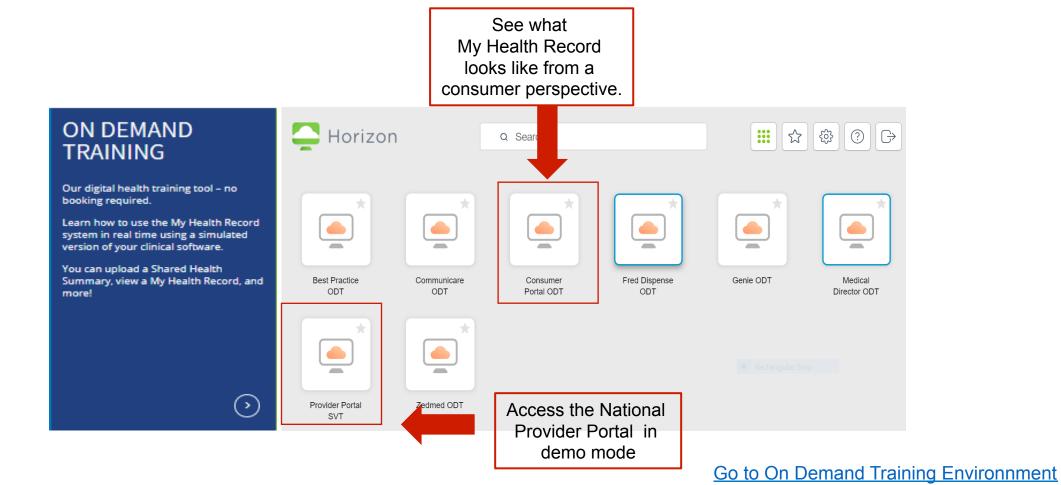

General principle is that the duty of confidence prevents the disclosure of the information to individuals and organisations not involved in providing the health service.

### **Learning Objective 3:**

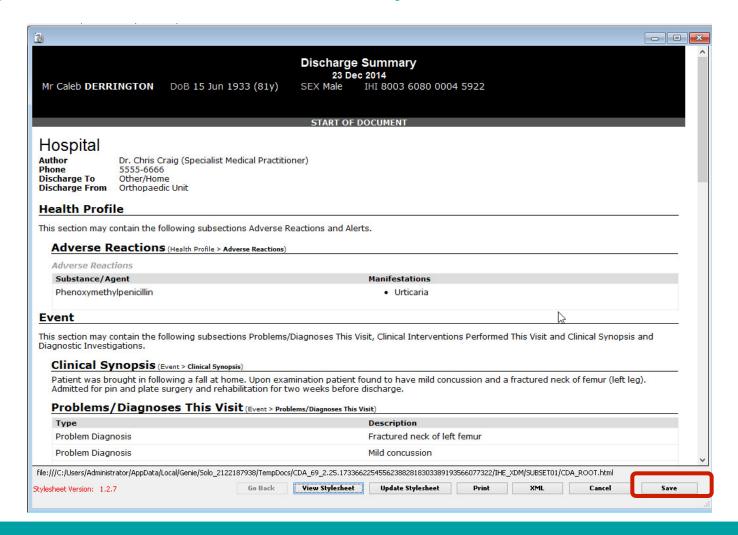

View summaries via My Health Record.

### Practise in the 'On Demand' test environment

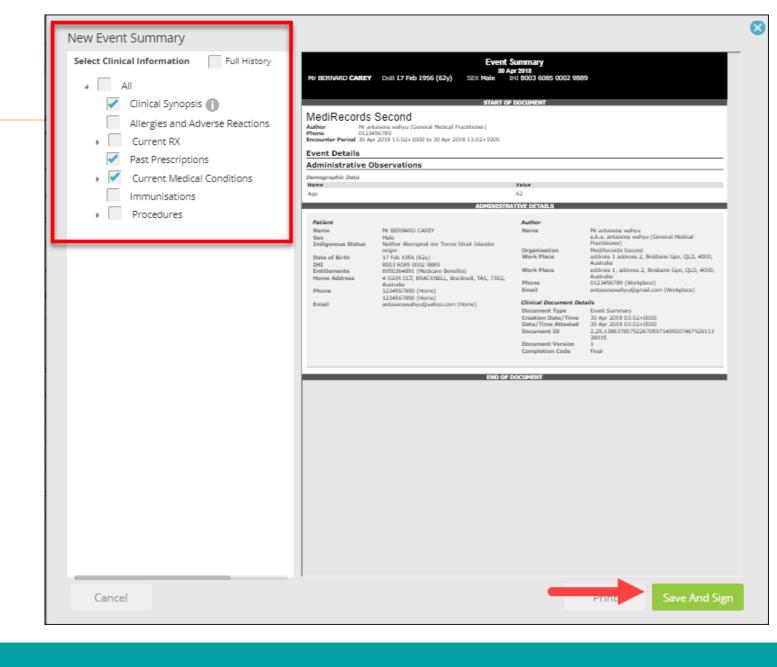

### **Access information**

### eg Discharge, Health or Event Summary

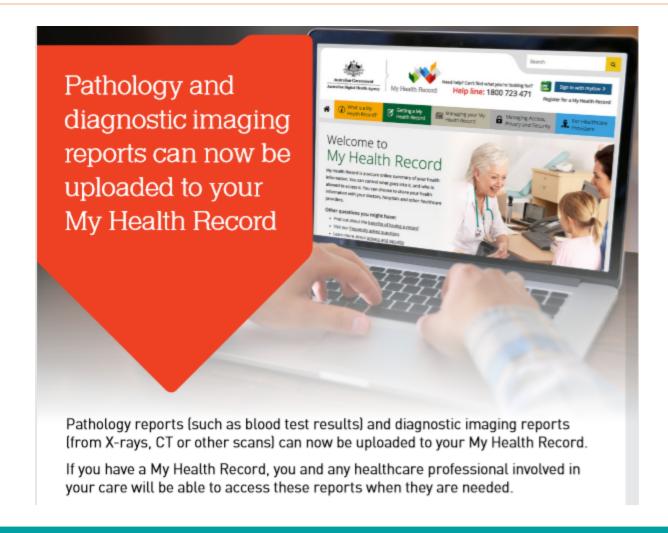

### Access information

Event Summary Includes a synopsis

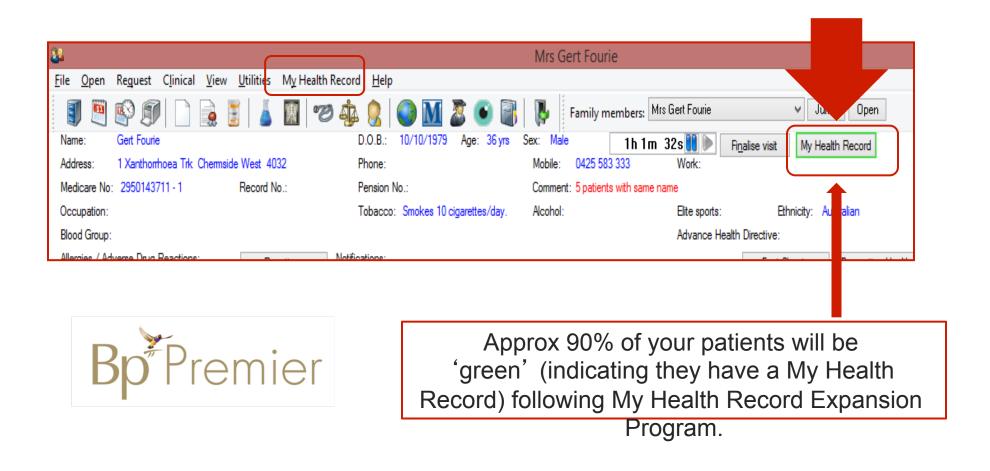

### Pathology and Diagnostic Imaging Reports

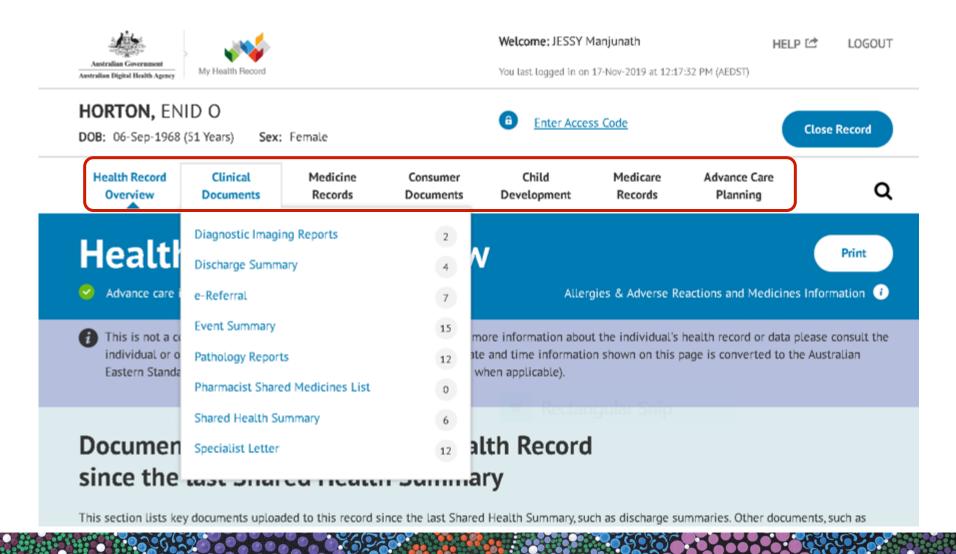

List of connected providers

### Upload & access via conformant software

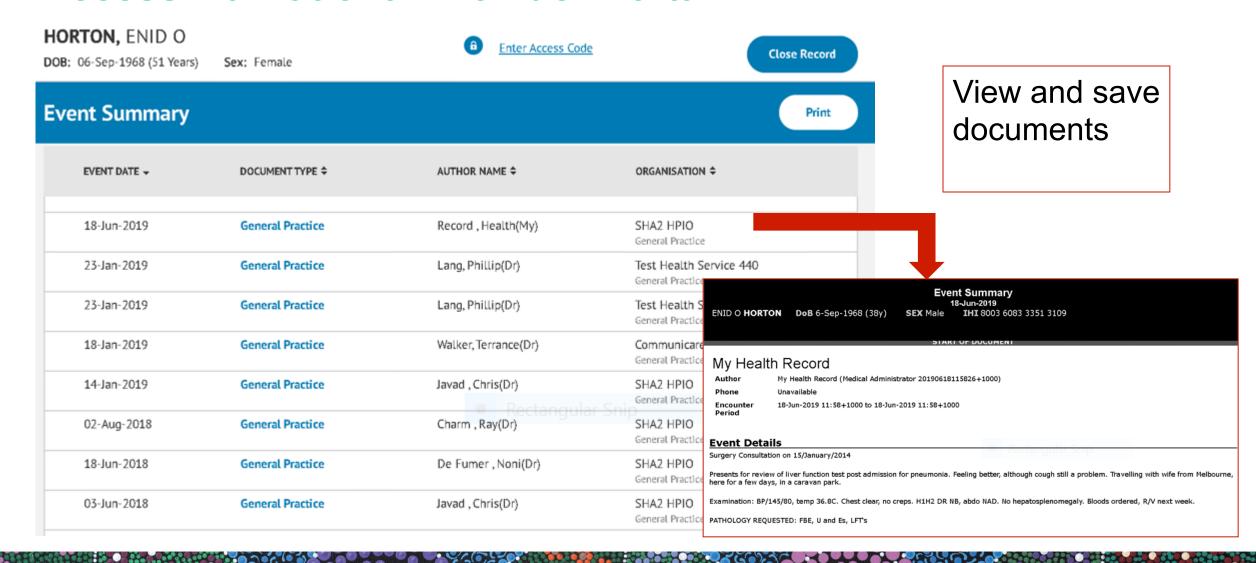

### **Access via National Provider Portal**

### **Access via National Provider Portal**

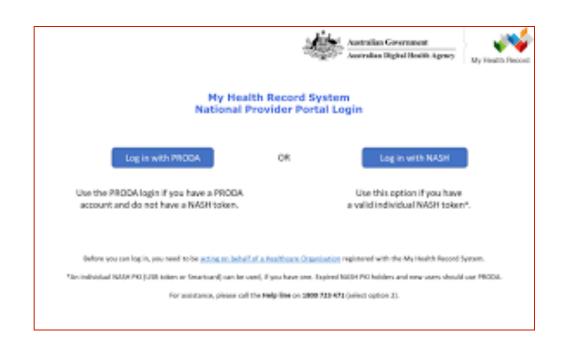

### **Learning Objective 4:**

Meet a dietetics Digital Health 'champion'.

# Q1: Are you currently using My Health Record and if so, do you connect via clinical software or via the provider portal?

## Q2: What are some of the benefits for dietitians of using My Health Record?

The key benefits of the My Health Record system are:

- Avoid adverse drug events
- Enhanced patient self-management
- Improvements in patient outcomes
- Reduce time gathering information
- Avoided duplication of services.

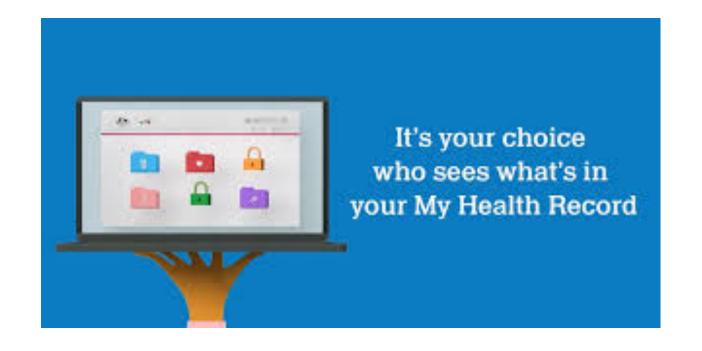

## Q3: What do you see as some of the benefits for patients of using My Health Record?

## Q4: What are some of the myths you've heard along the way about My Health Record?

Q5: If there was one key message to give your colleagues about using My Health Record what would it be?

## Secure Messaging:

Do you currently use secure messaging?

Is it easy to setup and use?

Benefits of secure messaging?

Cost effectiveness?

How does it benefit your patients?

Key messages for colleagues?

### **Learning Objective 5:**

Develop a plan for integrating digital health in practice.

### **Paperless Practice Checklist**

### For practices not currently using a Clinical Information System:

Review available options and decide which clinical software system to purchase	
Decide which <b>hardware</b> to purchase (or review and subscribe to a <b>cloud based product</b> )	
<b>Archive inactive patient files</b> (legislation requires medical records to be retained for 7 years for adults, until age 25 for kids). Consider bulk destruction of medical documents that are older than this.	
Create electronic files for all active patients and decide which documents you want to keep. Scan either the entire paper file into the new software system OR just those documents you want to access electronically.	
<b>Design a process for scanning</b> for the practice that ensures adequate review of incoming documents.	
As new patients register, create full demographic and clinical patient records for these patients. <b>Record all new patient information electronically</b> .	
Implement a <b>digital storage solution</b> with back-up facility to ensure ongoing accessibility to patient information.	
Implement an electronic <b>messaging system</b> to remove paper messages being moved around the practice. (Many clinical software systems include this feature).	
Patient Education – email patient education resources or make education material available on a practice website for download.	

### 5 steps to secure messaging success

- Find out which Secure Messaging software your regular referrers and contacts are using
- 2 Contact software vendor/s to organise a free trial of their system/s to securely exchange documents
- Select the secure messaging product/s that best meets your needs based on the software trial/s
- Configure your software address book for quick lookup of contacts
- Train your staff how to use the secure messaging system and notify your key contacts and referrers of your Secure Messaging identifier

### **Digital Health Toolkit - Dietetics**

Level 8, 350 Collins St Melbourne VIC 3000

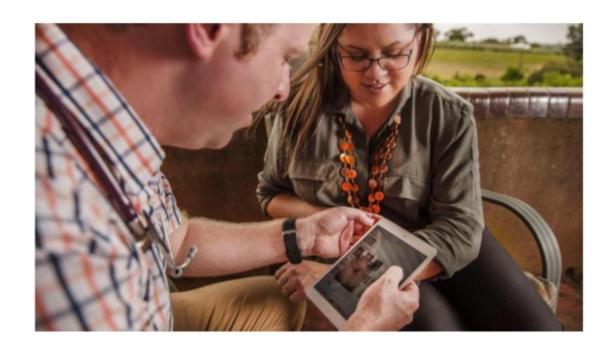

www.ahpa.com.au

## DIGITAL HEALTH TOOLKIT Dietetics

#### Introduction

More than 22 million or 90% of Australians now have an individual My Health Record. In addition, most general practices and pharmacies, over 700 public hospitals and health services, and a further 208 private hospitals are connected to My Health Record. With the addition of diagnostic imaging and pathology, and an increased push to connect specialists and allied health providers, My Health Record is becoming increasingly relevant and potentially useful for dietitians.

## New My Health Record online training for allied health professionals

### 5 modules:

- 1. Introduction to the system
- 2. Clinical documents and patient entered information
- 3. Viewing and uploading to the system
- 4. Privacy, security and consent
- 5. Supporting patient use of My Health Record

Online training for allied health
